"We were amazed at how quickly you completed the repair and at a very reasonable cost to us. Well below the hundreds, if not thousands, of dollars it would have taken to totally break up and repour the sidewalk. Plus your process allowed us to use the sidewalk almost instantly after the application while replacing it would have had to cure for days. With your 5 to 10 minute cleanup of the area the totally completed job took less than an afternoon. Thank you for a great job well done." - Eva and Spence K.
