BASEMENT DRAIN SYSTEMS

Our system keeps soil gases out of your home and regulates water flow while minimizing clogs. Unlike many other waterproofing systems, The SafeBase System has a rubber seal that helps protect your basement from moisture while being radon mitigation ready, giving you a drier and safer living area.

MULTI-FLOW TILE

- Erosion proof
- Pea rock backfill filters water
- Can be used with or without geotextile fabric based on soil types
- Directs radon to radon ports to be vented outside

SAFEEDGE

(SafeEdgeMAX shown)

- Minimizes airflow between edge and wall
- Radon and moisture vapor seal
- Overflow protection
- Holds vapor barrier in place
- Allows condensation from the wall to drain into the drain tile system

RADON / INSPECTION PORT

- Installed with every system

CRAWLSPACE & BASEMENT ENCAPSULATION

- Antimicrobial - Will Not Support Mold Growth
- Class A / Class 1 Fire Rated
- Nylon Reinforced & Tear Resistant- Will Not Rip, Rot, or Decay
- Seal From Water & Natural Gases Like Radon
- Significantly Raise HVAC Efficiency
- Pair With Dehumidifier

OUR PROVEN SYSTEM

	SAFEBASE™	Drain Tile	WaterGuard	Beaver
Drains water from the walls	✓	✓	✓	✓
